

Eminent is GREEN

Your Environmentally Friendly Options

It is an increasing trend for businesses to supply products that not only do what they promise their initial purpose is, but also have less impact on the environment. An awareness is overcoming the business world, a recognition that consumers are actively looking for products and services that preserve energy and resources. People want to grow into the trend of "being green".

Here at Eminent Custom Graphics Inc. we provide our clients with "green" choices. We provide many 3M materials with environmental advantages.

These products have no monomeric plasticizers or polyvinylchloride in their constructions and are made with less solvent during manufacturing compared to traditional solvent-based adhesive coated products. Chloride-free constructions such as these eliminate halogen-related disposal concerns.

Environmentally preferred packaging
3M has even developed environmentally preferred packaging by focusing on these three initiatives:

1. Boxless packaging: This initiative reduces the amount of packaging waste (boxes and endplugs) for customers to dispose, thus creating less packaging from ending up in our landfills.

2. SFI certification: The SFI® (Sustainable Forestry Initiative) label (which they have had since 2009) is a sign that an organization is buying wood and paper products from well-managed forests, and is backed by a rigorous, third-party certification audit.

3. Recycled resin endplug: 3M only uses recycled resin rather than virgin resin

Our eco-sol max inks
are a better choice for the
environment than traditional
solvent or screen printing inks

Our 3M Products with environmental Advantages:

- 3M™ Flexible Light Mat 3635-1000
- 3M™ Daylighting Film DF2000MA
- 3M™ Controltac™ Graphic Film with Comply™ Adhesive 3545C and 3M™ Scotchcal™ Overlaminates 8908 (luster) and 8909 (matte)
- 3M™ Wall Decorating Film IJ86E
- 3M™ Scotchcal™ Graphic Film IJ35E
- 3M™ Piezo Inkjet UV Ink Series
- 3M™ DI-NOC™ Architectural Finishes
